

THE 2012 NSF-CBMS CONFERENCE

MATHEMATICAL METHODS OF COMPUTED TOMOGRAPHY

May 29 – June 2, 2012
Department of Mathematics
University of Texas at Arlington

Principal Speaker

This conference features Peter Kuchment, Distinguished Professor of Texas A&M University, **as the lecturer. He will deliver ten lectures devoted to the classical and novel mathematical methods of computed tomography and medical imaging. Open problems and current directions will be also addressed.**

Complementary Lectures

Professor Leonid Kunyansky from the University of Arizona will lecture on the algorithmic and numerical aspects of tomography.

Financial Support for Participants

Financial support for attending the conference will be provided to about 25-30 participants. Established researchers as well as interested newcomers, postdoctoral fellows, and graduate students, are invited to attend. An online application and further information are available at:
