

INVERSE SCATTERING FOR RADAR IMAGING

May 27 - 31, 2008

**University of Texas at Arlington
Arlington, Texas, 76019-0408**

Principle Speaker

This conference will feature Prof. Margaret Cheney of Rensselaer Polytechnic Institute as the distinguished lecturer who will deliver ten lectures in the field of inverse scattering for radar imaging. The conference will bring all the major ideas and results in the field, provide a deeper understanding of the main open problems, and outline current directions in the field.

Financial Support for Participants

Financial support for about 25-30 participants will be provided to attend the conference. Both established researchers and interested newcomers, including postdoctoral fellows and graduate students, are invited to attend.

Online application is available at the url:
